

Commercialize your R&D projects results in Nanomedicine & Nanodiagnostics

OCT Group LLC
January 2010

Информация, содержащаяся в данной презентации, является конфиденциальной

If you ...

- are an inventor, medical device, biotech or pharma company developing drug / diagnostics on the basis of breakthrough Nanotechnologies (NT)
- have NT medical project close to or in commercialization stage, at least passed pre-clinics
- looking for project venture capital co-investments at comfortable conditions for a period up to 10 years
- took out patents on your NT product

And if your project...

- is technically realizable and scientifically substantiated
- has high commercial potential or social benefit or macroeconomic effect for Russia
- provides \geq 6m EUR of annual sales in 5 years
- strategically co-invested / full project period
- well-grounded in plan on commercialization of project results
- planned to be produced / conducted in Russia, entirely or partially

OCT & RUSNANO could offer you

- prior scientific, technical, commercial & business expert advice on medical NT projects
- preliminary trilateral negotiations on project feasibility with RUSNANO (Russian Corporation of NT)
- support in application of financing request to RUSNANO
- setting up project company = joint venture = RUSNANO as a venture co-investor + Applicant / Inventor (intellectual property, equipment) + Strategic co-investor + other co-investors
- full-scale multinational clinical trials support in accordance with ICH-GCP, EMEA / FDA requirements followed by registration

Your benefit will be

- sharing risks
- financial support in financial crisis conditions
- proper project feasibility study
- entering new promising market - Russia
- R&D cost savings
- access to administrative resource in Russia
- high local expertise & joint experience in clinical studies conduct in Russia
